

Canon City Geology Club

Minutes from December 9, 2013

This being the Christmas get together, there was no formal meeting held.

Members were reminded that someone is needed to lead a fund raising committee. Some ideas for this project are T-Shirts and Mugs.

John Nelson mentioned to members about starting a new Astronomy Club in the area.

Members present were also told of the 3 display cases at the old RSVP building. Please take time to stop and see these.

The Wrap-a-Rock gift exchange was a great success with everyone having a very good time.

The evening was topped off by a very enjoyable program, titled "Kaboom!", presented by Loretta Bailey and her daughter Kimberly who portrayed Shorty and Stub, hard rock miners who had worked at the Mica Lode Quarry. Shorty, who was the supervisor of the Quarry, was Loretta's father.

Respectfully submitted,

Kathy West
Recording Secretary
